PRE ENGINEERED BUILDINGS

ISO 7396-1 : 2016

The ECO Group started in 1997 in the spiritual land of Ganges in Varanasi. Later in 2012, ECO Group installed a one-million-ton-per-annum state-of-the-art cement manufacturing unit at Bhabhua, Bihar.

In order to integrate further with the Indian construction industry, the group has come up with a fully integrated steel plant with a capacity of 2 lakh tons per annum. This plant comprises sponge iron, billets, TMT, and a 12 MW power plant at Chunar, U.P. Also, in the way to expand, The ECO Group has already set its foot into the FMCG sector and has come up with an edible oil refinery along with a solvent extraction plant. With a mission to expand into the new horizon, ECO Group started a "Pre-Engineered Building and Heavy Structure" manufacturing unit, in the ambition of the "MAKE IN INDIA" campaign, seeing the convenience and importance of facilitating factory-made units for the upcoming projects.

ECOPLUS INDUSTRIES PVT. LTD. is a manufacturing company, focused on work for Industry and highway infrastructure, i.e., pre-engineered buildings for all steel construction requirements, industrial and commercial steel buildings, Heavy Structures and Steel Girders/Bridges, EOT Cranes & electric hoists etc.

ECOPLUS is a registered supplier of steel structures for govt. organizations like RDSO, DMRC, NCRTC, PWD, etc., to name a few...
